Probable Cause

This investigation was the result of a crash that occurred on Friday, January 22, 2021, at approximately 5:48 PM. This crash occurred on US Highway 441, 71.64 feet south of Northwest 43rd Street in Alachua County, Florida. This crash involved a Toyota Tacoma pickup truck with one male occupant, Jason Lee Saul (the defendant), who rear-ended a Chevrolet Silverado pickup truck with one male occupant, Andra Paul Driggers (the victim), who was stopped for a red traffic control signal. This crash resulted in the untimely death of Andra Paul Driggers. The initial collision caused the Chevrolet to collide into a Land Rover Discovery SUV with one male and one female occupant.

Two witnesses observed the defendant in the driver's seat of the Toyota. Multiple witnesses observed the defendant exit the Toyota.

When I arrived at this crash scene, I made contact with the defendant. As I approached the defendant, I saw that his eyes were glassy. I asked the defendant to provide a voluntary blood sample to identify or rule out any possible impairing substances. The defendant declined to provide a voluntary blood sample and spontaneously stated, he did not want the results to cause his parole to be violated.

While at this crash scene, Trooper David Hughes conducted Standardized Field Sobriety Exercises (SFSEs) with the defendant during which the defendant performed poorly displaying multiple clues of impairment.

Blood samples were obtained from the defendant through a warrant. Florida Department of Law Enforcement (FDLE) analyzed the defendant's blood and detected Cocaine in the amount of 40 ng/mL plus/minus 10 ng/mL and Benzoylcegonine (main metabolite of cocaine) above the quantitated range of 50-1000 ng/mL.

Doctor Bruce Goldberger reviewed the FHP incident and FDLE toxicology reports; and watched the video of the defendant's SFSEs. Doctor Goldberger stated, the toxicology report indicates the recent ingestion of cocaine. The concentration of cocaine and its metabolite, benzoylcegonine, are consistent with the recreational use of cocaine. Cocaine is a potent central nervous system acting psychostimulant capable of impairing cognitive and motor performance." Based on this information, the defendant's ability to operate a motor vehicle safely was impaired at the time of this crash.

Using accepted reconstruction formulae and Event Data Recorder information, the defendant was driving a minimum speed of 63 miles per hour in the posted 50 mile per hour speed limit zone when he

collided into the victim and was driving a minimum speed of 74 miles per hour in the posted 50 mile per hour speed limit zone just prior to colliding into the victim.
